

The Finnish theme could be supported by f.e. "Kalevala"-inspired wooden figures, made-up trees and real fallen logs to climb over. For the playing experience the park would offer visually attractive labyrinths and climbing facilities. The highlight of the park for kids would be a water zone for experimenting and splashing: there could run a stream of water, which would be blocked in different ways incl. water wheels, mini-bridges, hand pumps, mini-waterfall etc., and a small (max 1 m deep) body of water with a cable raft for kids to drag themselves on (in the winter can be used for skating when the raft is removed).
